This group of treatments is the single most difficult in dentistry – and because of the biological influences over healing, guarantees cannot be given. If however, we have to remove any root – filled tooth within one year, 30% of the endodontic fee will be credited to your account and as a goodwill gesture, the extraction will be done at no further charge. (applies to in-house work only) Some root canals will need to be referred to a specialist who uses a microscope to get the best outcome.
